

Individual nutrition

Food intolerance - a topic that is a natural part of the school day at the St. Anna School Association. And that since 2010 – when a special diet kitchen was created under the direction of chef Jörg Niemann.

It is important to us that all students take part in daily lunch with classmates, teachers and educators. That is why our state-certified diet cook and his team adapt the individual meals to our menu daily. It goes without saying that they also pay attention to a fresh, varied and healthy diet.

For the following food intolerances, our school kitchen can prepare a meal for your child individually:

- lactose free
- gluten free
- lactose and gluten free
- vegetarian

Please understand that our kitchen cannot cater to all food intolerances.

If you have any questions or would like to order special meals, please contact the student admission department: aufnahme@st-anna.eu or telephone 089 232326423.
